AZURE BOAT COMPANY INTRODUCES THE ALL-NEW AZ220 XTREME WAKE PACKAGE SPORT DECK

Azure Boat Company based in Moncks Corner, South Carolina, proudly introduces the all-new AZ220 XTREME Wake Package Sport Deck. Measuring in at 22 feet in length, its distinctive style balances both the performance of a tow boat, as well as space utilization and bow seating of a pleasure craft. The AZ220 clearly makes its mark in the crossover tow boat market.

From the first sight of the sculpted swim platform with Soft-deck Mat, to the equally inviting cockpit arrangement, the AZ220 never ceases to amaze the eye. Artful lines sweep from bow to stern, creating one of the sleekest and most exciting crossover tow boats available. The stainless steel trimmed low profile tinted windshield accents the lines and dimensional chrome sport graphics, while the sculpted interior with cross stitched accents bathes you in comfort.

The AZ220 as an aggressively arched aluminum wakeboard tower with racks. The tower has the option of being outfitted with a pair of wakeboard tower speakers with an additional power amp and comes standard with a bimini top. Other wakeboard-friendly amenities are the digital depth gauge, custom fog resistant gauges, optional GPS with a four inch LCD screen, power steering, lockable water tight storage compartment, optional compass, stainless steel windshield magnet, under floor storage and stainless steel telescoping four-step stern ladder.

The AZ220 offers comfortable bow and cockpit seating, plus an aft convertible three-position sunpad for sunbathing. Built for extended time on the water, the AZ220 is equipped with a Jensen AM/FM/CD player with MP3 port and four speakers, optional bow shower, optional bow filler cushion, optional bow and/or stern mounted white dinette table, cockpit wetbar with sink, optional porta potti for head, integrated 25-gallon cooler, iPod holder, stainless steel cup holders, ski tow and optional extended activity/swim platform, plus much more.

The AZ220 is built using Azure's patented SureTrac™ deep 20 degree deadrise hull, which combines innovations in efficiency, acceleration, high and low speed handling and noise dampening. SureTrac™ turning fins guarantee smooth, crisp turns that tow boats are known for, while StraitTrac™ transom extensions assure unmatched slow speed stability, and throw a perfect wake. Azure's sound suppression Technology™ even cancels out sound waves generated by the vented chine pockets, to create the quietest, smoothest and safest ride on the water.

Azure Boat Company is locally owned and operated with more than 50 years of boat building experience. Azure offers a full line of sport boats to include bow riders, sport decks, cuddys and cruisers. All Azure boats are NMMA Certified and meet or exceed United States Coast Guard standards. Azure proudly powers their boats with MerCruiser inboards.
